

Objective

Leverage my expertise in Master Data Management (MDM) and data governance, contributing to organization's success by ensuring data accuracy, efficiency, and strategic decision-making.

Education

Dwarkadas J. Sanghvi College of Engineering	2017 - 2021
B.E. Electronics and Telecommunications CGPA 8.01	
Nirmala Memorial Foundation College of Commerce and Science	2017
Higher Secondary Certificate 80.31%	

Work Experience

Software Engineer Master Data Management Developer	Aug 2025 - Current
EPAM Systems	
- Developed configuration solutions to scale the existing Stibo Systems MDM platform and supported live production systems. - Provided technical leadership for delivering complex platform enhancements, driving solution design, coordinating releases, and ensuring operational excellence across production and non-production environments.	
Associate Master Data Management Developer	Jun 2024 - Aug 2025
PwC Service Delivery Centre	
- Implemented comprehensive and thorough MDM solutions for beverage and retail chain companies, covering supply chain, packaging, and R&D, to guarantee data reliability, uniformity, and adherence to industry standards - Built and configured demo MDM solutions in Stibo Systems, including data modeling and product onboarding scenarios, to demonstrate platform capabilities to clients.	
Programmer Analyst Master Data Management Developer	Aug 2021 - Jun 2024
Cognizant Technology Solutions	
- Implemented robust and end-to-end MDM solutions for healthcare and publishing media firms, ensuring data accuracy, consistency, and compliance with industry regulations. - Efficiently implemented API integrations, WEB UI design, workflows and data steward configurations, business rules, system testing and documentation which reduced the user-dependency by 60%. - Conducted comprehensive training sessions to equip teams with essential skills and knowledge for optimized performance. - Acquired foundational ETL knowledge, complementing expertise in MDM and contributing to enhanced data integration practices..	

Skills

- Programming languages:** C, SQL, Java, JavaScript, HTML, CSS, Python, JSON, XML.
- Domain skills:** Master Data Management, ETL (Extract, Transform, Load), API Integrations and testing.
- Software platform:** Stibo PIM, Informatica MDM, Reltio MDM, Informatica PowerCenter, JIRA, Tableau, MS Office, Soap UI
- Interpersonal skills:** Dynamic and adaptable decision making skills with exceptional communication, collaborative, problem-solving skills, time management, effective leadership abilities.

Projects

- MDM Architecture for publishing and media firm:**
Development of a robust architecture and WEB UIs on STIBO MDM by integrating and consolidating data from various source systems via APIs for efficient product and supply management.

- **MDM Enhancement and support in healthcare domain:**
Provided continuous support for Informatica MDM along with development of enhancement features and patch updates in customer domains for smooth functioning of across all upstream and downstream systems.
- **MDM Architecture for supply chain and packaging :**
Developed an architecture and WEB UIs on STIBO MDM, integrating and consolidating data from various source systems via APIs to enable efficient supply chain planning, packaging, R&D, and management, ensuring comprehensive coverage and reliability across all operations.
- **Cloud based application for diet regulation through continuous glucose monitoring (July 2020):**
Development of an application which sends notifications about dieting and glucose levels by continuously monitoring glucose level of a person and achieved data mapping accuracy of 95%.

Certifications

- “MDM Solutions Fundamentals” and “Data Modeling” certifications from “Stibo Systems”
- “MDM SaaS Applications Foundation” certification from “Informatica ”
- “Solution Architect Foundation” certification from “Reltio”
- English: IELTS band 8.0 out of 9.
- “Data Warehouse Fundamentals”, “Python Programming”, “Image Processing” on Udemy.
- “Customer Needs”, “Tackle Time Management”, “Effective Communication” and “Productivity Machine” on Udemy.

Other Achievements

- Published research paper on “Autonomous Parking System Perception and Control Simulations on ROS-Gazebo” in “Proceedings of International Conference on Wireless Communication”
